

Two Days workshop for +2 students

HOW TO MAKE YOUR OWN ROBOT

Date : 27/05/2020 to 28/05/2020

Time : 5.00 pm(IST)

Platform: ZOOM Meeting & YouTube Live Broadcast

A two days online workshop for the 12th standard students titled as “How to make your own Robot” was organized by the department of Electrical and Electronics engineering, Aarupadai Veedu Institute of Technology, Chennai. The programme was organized in association with Cornerstone, Incubatee of Ganesan Innovation and Incubation Center-AVIT and Institution Innovation cell AVIT.

The two days programme was technically handled by Mr.Subramanian, Installation and Commissioning Engineer, Cornerstone and his team. The programme was hosted through Zoom meeting and was also live broadcasted in youtube channel of AVIT. A total 129 students had registered for the event and 83 successfully completed the course. The certificates were issued after verification of viewership and assessment for both the days.

The session started on 27/05/2020 with a formal welcome address by Dr.L.Chitra, HoD / EEE. In the first day students were taught about the basics of Robotics and on the second day emphasis was on programming and hardware integration. There were more than 400 views of the video broadcasted in the youtube. To make this event more interesting and in order to make the students of Department of EEE to take part in the events of the Dept even during the lockdown period the event was entirely hosted by the students of EEE and Mechatronics. In the end of the day 2 session students presented the highlights of the department which showcased the projects that has been completed successfully by utilizing the research labs available in the Institution. This presentation could be an eye-opener for the school students who participated in the workshop to create an awareness of the facilities in the Department and Institution too.
