Report on Alumni report on Technology Transfer

An Alumni lecture series was organised by the Department of Electrical and Electronics Engineering department along with the Alumni Association of AVIT on 22.05.2020 titled as “Technology Transfer”.

This session was handled by Mr. Sameer Ranjan, an Alumni of 2012, who is currently a Senior Software developer in HCL Technologies. It was an amazing session. He started the session with the basic definition of technology transfer. He defined that the change that is being brought in partially or completely in our existing system software or tools in order to improve skills. And he discussed different aspects and ideas about transferring skills, knowledge and developments among various networks and making it available to a wider range of users. He also mentioned that technology can be acquired in two ways. Either it can be developed or purchased. And he discussed about the issues related to software and ways to rectify it so that we can develop a more efficient and reliable platform.

The session was very interactive and he answered many queries raised by the students. It was a very useful session and the students were greatly benefitted.
