

## **ANTIRABIES AND VACCINATION AWARENESS PROGRAM**

Antirabies vaccination and Vaccination awareness program was organized by UBA in association with the Department of Biotechnology, AVIT from 18.09.2018 to 20-9-2018 in the five adopted villages as a part of the World Rabies day events 2018. It is important for Children and Public health. Vaccination is an effective way of preventing from various diseases like measles, mumps and Whooping cough and is still a threat. The goal of immunizing children against chief diseases responsible for child mortality and morbidity is indeed a noble one. Hence UBA has organized Vaccination awareness Camp and the faculties explained about the importance of vaccination for the newborn especially about Polio, Measles, Jaundice and outlined the consequences and its effects. Further, they explained about the Small pox, Chicken pox and Rabies diseases mode of infection, transmission, symptoms of affected individual and type of vaccination to be administered. The village people actively participated in the awareness programme and they cleared their doubts about immunization.

### **SIRUTHAVUR VILLAGE**

Dr.Chozhavendhan /Associate Professor and Ms.Deepapriya/ Assistant Prof.  
Department of Biotechnology, AVIT Addressing the Villagers.

Dr.B.Prabasheela /Associate Professor, Department of Biotechnology, UBA  
coordinator, AVIT Addressing the Villagers.

**AALTHUR VILLAGE**

Dr.Vinoth /Assistant Professor, Department of Biotechnolog, AVIT Addressing  
the Villagers.

## KOTHIMANGALAM VILLAGE

Dr.Subbiah /Associate Professor, Department of Biotechnolog, AVIT  
Addressing the Villagers.

## ARUNKUNDRAM VILLAGE

Ms.A.Nirmal /Assistant Professor, Department of Biotechnolog, AVIT  
Addressing the Villagers.

**Students and Staff of Biotechnolog, AVIT with the Villagers**

## NADUVAKKARAI

Ms.Deepapriya/ Assistant Prof. Department of Biotechnology, AVIT  
Addressing the Villagers.

Ms.A.Nirmal /Assistant Professor, Department of Biotechnolog, AVIT  
Addressing the Villagers.
